

**ASSEMBLY BILL**

**No. 2173**

---

**Introduced by Assembly Member Bradford**

February 20, 2014

---

An act to amend Sections 406, 21207.5, and 24016 of the Vehicle Code, relating to vehicles.

LEGISLATIVE COUNSEL'S DIGEST

AB 2173, as introduced, Bradford. Vehicles: electric bicycles.

Existing law defines a motorized bicycle in one case as a device that has fully operative pedals for propulsion by human power and has an electric motor that meets specified requirements, including that it has a power output of not more than 1,000 watts, is incapable of propelling the device at a speed of more than 20 miles per hour on ground level, and is incapable of further increasing the speed of the device when human power is used to propel the motorized bicycle faster than 20 miles per hour, and requires it to meet other specified criteria.

This bill would redefine this type of “motorized bicycle” by, among other things, renaming it a “low-speed electric bicycle,” stating that it can have either 2 or 3 wheels, lowering the maximum power output to 750 watts, and requiring that it weigh no more than 80 pounds. The bill would exempt a low-speed electric bicycle from the provision prohibiting the operation of a motorized bicycle on a bicycle path or trail, bikeway, bicycle lane established as provided, equestrian trail, or hiking or recreational trail. The bill would also make conforming changes.
